elms occur both naturally and cultivated throughout much of the temperate world because of their high tolerance to extreme growing conditions and their widespread distribution elms have been widely planted in cities towns and rural areas throughout north america and northern europe as such their current demise due to several pandemics of dutch elm disease has spurred a huge body of research on breeding for disease resistance conservation and systematics the elms breeding conservation and disease management provides the current state of knowledge in these areas and is an important reference work for pathologists breeders taxonomists and arborists

in 2010 mary mackillop became the first australian citizen to be officially proclaimed a saint by the catholic church this event and the long canonisation process which preceded it has received much coverage in the australian media yet confusion persists over what exactly it means to be a saint in this book scholars from the catholic theological college of south australia and the flinders university school of theology share reflections from different perspectives historical biblical philosophical theological ethical spiritual liturgical and personal veneration of st mary mackillop is set in the context of a tradition which can be traced back to christian martyrs in the ancient roman empire and which it is argued is still meaningful today

this book gives an insight into how our lancashire ancestors lived and interacted with the environment in which they existed over the centuries apart from a general history of darwen life this volume covers not only the very first ancestral tree but follows the story of one particular family branch through to the twentieth century and into living memory the story includes detailed information of many other families which whom the harwoods have intermingled over the centuries and it would be a rare darwener who could not find some connection to his own ancestors within these pages enthusiasm in depth research and a unique authorial voice this book is what genealogy should result in it locates the harwood family in a specific historical place and then watches them grow up and move out family journeys are explored from the paper mills of kent to the goldfields of ballarat and maori massacres the sheer numbers of documents illustrated show both their value as evidence and the breadth of mike s research there are fruitful and informative diversions into work leisure and religion with excursions into the history of education nonconformity and workhouses among many other things it s a story of lancashire and a lancashire in the world and it s hard to argue with its announcement of itself not as a history but as the history of the lancashire harwoods they are both typical and unique and in tracing the development of lancashire from a rural to an industrial economy mike never loses focus on his ancestors place in it neil sayer archive access manager lancashire archives

this book is concerned with the history of tourism at the coranderrk aboriginal station at healesville northeast of melbourne which functioned as a government reserve from 1863 until its closure in 1924 at coranderrk aboriginal mission interests and tourism intersected and the station became a showplace of aboriginal culture and the government policy of assimilation the aboriginal residents responded to tourist interest by staging cultural performances that involved boomerang throwing and traditional ways of lighting fires and by manufacturing and selling traditional artifacts whenever government policy impacted adversely on the

aboriginal community the residents of coranderrk took advantage of the opportunities offered to them by tourism to advance their political and cultural interests this was particularly evident in the 1910s and 1920s when government policy moved to close the station

presents a selection of vacation destinations to avoid with advice to travelers on steering clear of places that are vulnerable to such vacation ruining elements as crime natural disasters and overpriced or overrated venues

in my life of ministry writing teaching and traveling the autobiography of an old mines missionary i present my life as a child growing up in a french village about sixty miles south of st louis in the middle of the twentieth century after eighteen years of life in old mines the oldest settlement in the state of missouri i moved to st louis for four years and then to st meinrad indiana for four years where education opened my eyes to a world very much larger than my village of origin life continued for me after ordination as a priest in the roman catholic church in springfield and joplin missouri because my life is the thread stitching together this book i have made it manageable by dividing it into four categories ministry writing teaching and travel these categories contain the stories of others whose life threads of seventy years are woven into my lifetime tapestry this is my autobiography one of a missionary from old mines to the thirty nine counties forming the southern third of the state of missouri composed during my seventieth year of life

contains 220 papers presented at the ghgt 5 held in august 2000

this book addresses the challenges and opportunities faced by the world s forests posed by climate change conservation objectives and sustainable development needs including bioenergy outlining the research and other efforts that are needed to understand these issues along with the options and difficulties for dealing with them it contains sections on sustainable forestry conservation forest resources worldwide forests forestry and climate change the economics of forestry tree breeding commercial forestry biotechnological approaches genomic studies with forest trees bio energy lignin wood and forest science including ecological studies the chapters are contributed by prominent organisations or individuals with an established record of achievement in these areas and present their ideas on these topics with the aim of providing a ready source of information and guidance on these topics for politicians policy makers and scientists for many years to come

running times magazine explores training from the perspective of top athletes coaches and scientists rates and profiles elite runners and provides stories and commentary reflecting the dedicated runner s worldview

world population is increasing at an alarming rate and this has resulted in increasing tremendously the demand for tree products such as wood for construction materials fuel and paper fruits oils and medicines etc this has put immense pressure on the world s

supplies of trees and raw material to industry and will continue to do so as long as human population continues to grow also the quality of human diet especially nutritional components is adversely affected due to limited genetic improvement of most of fruit trees thus there is an immediate need to increase productivity of trees improvement has been made through conventional breeding methods however conventional breeding is very slow due to long life cycle of trees a basic strategy in tree improvement is to capture genetic gain through clonal propagation clonal propagation via organogenesis is being used for the production of selected elite individual trees however the methods are labour intensive costly and produce low volumes genetic gain can now be captured through somatic embryogenesis formation of embryos from somatic cells by a process resembling zygotic embryogenesis is one of the most important features of plants in 1958 reinert in germany and steward in usa independently reported somatic embryogenesis in carrot cultures since then tremendous progress in somatic embryogenesis of woody and non woody plants has taken place it offers a potentially large scale propagation system for superior clones

over 500 pages of facts statistics and records of every match and every player for the australian national rugby union team from the first match in june 1899 up to december 2023
