contending that early modern fictional portrayals of sexual violence identify the position of the author with that of the chaste woman threatened with rape amy greenstadt challenges the prevalent scholarly view that this period s concept of the author was inherently masculine instead she argues the analogy between rape and writing centrally informed ideas of literary intention that emerged during the english renaissance analyzing works by milton sidney shakespeare and cavendish greenstadt shows how the figure of the author and by extension ideas of the modern individual derived from a paradigm of female virtue and vulnerability this volume supplements the growing body of studies that address the relationship between early modern textual representation and notions of gender and sexuality it also adds a new dimension in considering the wider origins of modern concepts of selfhood and individual rights

when it comes to food americans seem to have a pretty great deal our grocery stores are overflowing with countless varieties of convenient products but like most bargains that are too good to be true the modern food system relies on an illusion it depends on endless abundance but the planet has its limits so too does a healthcare system that must absorb rising rates of diabetes and obesity so too do the workers who must labor harder and faster for less pay through beautifully told stories from around the world kevin walker reveals the unintended consequences of our myopic focus on quantity over quality a trip to a costa rica plantation shows how the cavendish banana became the most common fruit in the world and also one of the most vulnerable to disease walker s early career in agribusiness taught him how pressure to sell more and more fertilizer obscured what that growth did to waterways his family farm illustrates how an unquestioning belief in free markets undercut opportunity in his hometown by the end of the journey we not only understand how the drive to produce ever more food became hardwired into the american psyche but why shifting our mindset is essential it starts walker argues with remembering that what we eat affects the wider world if each of us decides that bigger isn t always better we can renegotiate the grand food bargain one individual decision at a time

the central claim of *Minds in Motion* is that british travel writing of the long eighteenth century functions as an epistemological playing field where authors test empiricist models of engagement with the world while simultaneously seeking out the role of the self and the imagination in producing knowledge whether exploring the relationship between the senses and the mind the narrative viability of experimental detachment or the literary dynamics of virtual witnessing eighteenth century travel authors persistently confront their positionality and raise difficult questions about the nature and value of first hand experience in one way or another they also complicate empiricist ideals by exploring the limits of individual perception and the role of the imagination in generating and relating knowledge while the genre is often viewed as either numbingly documentary or non literary and commercial travel literature actually operates at the front line of the period s intellectual developments illustrating both how individual writers grapple with philosophical ideals and how these ideals filter into the lives of ordinary people indeed travel literature directly engages the scientific and philosophical concerns of the period while it is also widely avidly read as such it offers models for cognitive and rhetorical practices that are evaluated and either embraced or rejected by readers in a process of identification not unlike that which occurs in early english fiction moreover because eighteenth century travel literature is so crucial to the development of so many fields from botany to the novel it illustrates vividly the divisive energies of discipline and genre formation while also archiving the shared aims and methods of what will become discrete fields of study travelogues as diverse as margaret cavendish s *Blazing World* 1666 and samuel johnson s *Journey to the Western Islands of Scotland* 1775 reveal the epistemological circuitry of the eighteenth century and historicize the absorption of the philosophical tendencies that have come to define modernity

although there had been experiments with the use of a new form of transport the â trackless tramâ better known as the trolleybus during the first decade of the 20th century it was in june 1911 that bradford and leeds became the countryâ s pioneering operators of trolleybuses there had been earlier experimental users â in places like hove and london â and as the tide turned against the tram in many towns and cities the trolleybus became a popular alternative with the trolleybus coming to dominate the provision of local public transport in places like derby and ipswich this volume â one of four that examines the history of all trolleybus operators in the british isles â focuses on the systems that operated in wales the midlands and east anglia
