new zealand has an unparalleled selection of superb day walks ranging from the easiest short strolls to more strenuous full day

tramps these encompass all of new zealand s landscape diversity from cape reinga to stewart island day walks in new zealand is a guide to the best of them with short track descriptions beautiful photography and high quality maps from geographx this edition is completed revised with a refreshed selection of walks new text photography and maps

the book presents an up to date detailed overview of the quaternary glaciations all over the world not only with regard to stratigraphy but also with regard to major glacial landforms and the extent of the respective ice sheets the locations of key sites are included the information is presented in digital uniformly prepared maps which can be used in a geographical information system gis such as arcview or arcgis the accompanying text supplies the information on how the data were obtained geomorphology geological mapping air photograph evaluation satellite imagery how the features were dated 14c tl relative stratigraphy and how reliable they are supposed to be all references to the underlying basic publications are included where controversial interpretations are possible e g in siberia or tibet this is pointed out as a result the information on quaternary glaciations worldwide will be much improved and supplied in a uniform digital format the information on the glacial limits is compiled in digital form by the coordinators of the project and is available for download at booksite elsevier com 9780444534477 completely updated detailed coverage of worldwide quaternary glaciations information in digital uniformly prepared maps which can be used in a gis such as arcview or arcgis step by step guideline how to open and use arcgis files possibility to convert the shapefiles into googleearth kmz files availability of chronological controls

human colonization of new zealand has dramatically altered the resident biota introduced numerous alien organisms to these once remote islands and exported local species to the world this book reviews invasions investigates what controls the success of invaders and studies the consequences for ecosystems both on land and offshore the book tests current theories about the success of invaders and evaluates principles for effective management of biological invasions worldwide

this book brings together an overview of the recent geological history active earth and biological processes and human settlement of

new zealand topics covered include the very active neotectonic and volcanic setting mountain geomorphic processes are examined and new ideas about landsliding are highlighted the exceptional sedimentary archives of the whanganui basin are also presented as one of two land masses that extend into the southern mid latitudes new zealand is ideally located to investigate changes in southern ocean climate related to this mountain glaciation in new zealand is a focus in global climate change debates new zealand also has a unique biota due to its long isolation and is the last major land mass to be settled by people advances in dna technologies have revolutionised our understanding of the histories and processes involved the book provides a comprehensive review of existing work and highlights new ideas and major debates across all these fields

the analysis of vegetation history is one of the prime objectives for vegetation scientists in order to understand the recent composition of local floras and plant communities a second knowledge of species composition during recent millenia is essential with the present concern over climate changes due to human activities an understanding of past vegetation distribution becomes even more important since the correlation between climate and vegetation can often be used to predict possible impacts to crops and forests i was very fortunate to receive the help of drs webb and huntley to compile this volume on vegetation history they have collated an impressive set of papers which together give an account of the vegetation history of most of the continents during the late tertiary and quaternary periods there are however gaps in the coverage achieved most notably africa and asia apart from japan the information in this book will nonetheless certainly be used widely by vegetation scientists for the regions covered in the book and much of it has relevance to the areas not explicitly described the authors of the individual chapters have done their best to cover recent topics of interest as well as established facts it is intended that a separate volume will be produced in the near future covering the vegetation history of africa and asia i thank the editors of it fits well into the this volume for their commendable achievement

includes proceedings of member institutes of the society and of the society's science congress through v 84 1956 57

the proceedings or notices of the member institutes of the society form part of the section proceedings in each volume lists of

members are included in v 1 41 43 60 64

volumes 33 38 section b include 1949 1955 of new zealand geological abstracts published by the new zealand geological survey

this volume brings together nineteen papers of interdisciplinary quaternary science honoring stephen porter special paper 548 features papers from six continents on wide ranging topics including glaciation paleoecology landscape evolution megafloods and loess the topical and geographical range of the papers as well as their interdisciplinary nature honor porter s distinct approach to quaternary science and leadership that influence the field to this day

the handbook of new zealand mammals is the only definitive reference on all the land breeding mammals recorded in the new zealand region including the new zealand sector of antarctica it lists 65 species including native and exotic wild and feral living and extinct residents vagrants and failed introductions it describes their history biology and ecology and brings together comprehensive and detailed information gathered from widely scattered or previously unpublished sources the description of each species is arranged under standardised headings for easy reference because the only native land breeding mammals in new zealand are bats and seals the great majority of the modern mammal fauna comprises introduced species whose arrival has had profound effects both for themselves and for the native fauna and flora the book details changes in numbers and distribution for the native species and for the arrivals it summarises changes in habitat diet numbers and size in comparison with their ancestral stocks and some of the problems they present to resource managers for this third edition the text and references have been completely updated and reorganised into family chapters the colour section includes 14 pages of artwork showing all the species described and their main variations plus two pages of maps

includes proceedings of member institutes of the society and of the society s science congress through v 84 1956 57

the ross orogen of the transantarctic mountains is the part of the orogenic system that formed at the pacific continental margin of

present day antarctica according to a recent hypothesis this continental margin was created by the rifting and subsequent drift of laurentia from gondwana with an unparalleled breadth and depth of information this book provides a detailed synthesis of the history of the ross orogen in doing so it incorporates classical studies with discussions of the most recent and controversial research from the international community the book also includes a comprehensive bibliography and a historical chronology of all expeditions that have worked on the ross orogen in the transantarctic mountains from the first sightings by ross in 1840 right up to the present day this review of the ross orogen of the transantarctic mountains will be valuable to all geologists interested in these episodes in the earth s history and to researchers of the geology of antarctica

though the new zealand wine industry really began only fifty years ago vines and winemakers have now spread across the land from central otago to kumeu waipara to wairarapa to produce notable wines to global acclaim for half a century geographer and wine enthusiast warren moran has followed the development of the industry talking to the winemakers and tasting the wines in this book he provides an unrivalled introduction to new zealand wine the climate soils and geography the winemakers work with the grape varieties they have tried to tame and the extraordinary personalities families and companies who have made the wine and the industry internationally recognized illustrated with three dimensional maps of regions and localities and spectacular photographs of the vineyards the wines and the winemakers new zealand wine the land the vines the people is a must for all of those interested in understanding the extraordinary wines of new zealand

the question didn t seem to be so much why we swim as where and how we swim and with whom also where we fail to swim water threatening to flood our lungs or the lungs of others as well as where we rise and float ingrid horrocks had few aspirations to swimming mastery but she had always loved being in the water she set out on a solo swimming journey then abandoned it for a different kind of immersion altogether one which led her to more deeply examine relationships our ecological crisis and responsibilities to those around us where we swim ranges from solitary swims in polluted rivers in aotearoa new zealand to dips in pools in arizona and the peruvian amazon and in the ocean off western australia and the south coast of england part memoir part

travel and nature writing this generous and absorbing book is about being a daughter sister partner mother and above all a human being living among other animals on this watery planet

over 500 pages of facts statistics and records of every match and every player for the Australian national rugby union team from the first match in June 1899 up to December 2023
