colonising new zealand offers a radically new vision of the basis and process of britain s colonisation of new zealand it commences by confronting the problems arising from subjective and ever evolving moral judgements about colonisation and examines the possibility of understanding colonisation beyond the confines of any preoccupations with moral perspectives it then investigates the motives behind britain s imperial expansion both in a global context and specifically in relation to new zealand the nature and reasons for this expansion are deciphered using the model of an organic imperial ecosystem which involves examining the first cause of all colonisation and which provides a means of understanding why the disparate parts of the colonial system functioned in the ways that they did britain s imperial system did not bring itself

into being and so the notion of the empire having emerged from a supra system is assessed which in turn leads to an exploration of the idea of equilibrium achievement as the prime mover behind all colonisation something that is borne out in new zealand s experience from the late eighteenth century this work changes profoundly the way new zealand s colonisation is interpreted and provides a framework for reassessing all forms of imperialism
